

# 7 Reasons to Hire a Building Envelope Consultant

Protect your facility, reduce risk, and extend the life of your assets.

## Critical Barrier Expertise

Your building envelope defends against air, water, and heat. We're the first to step in—because at Technical Assurance, we run to trouble.

## Performance Assessment

We evaluate the condition of your existing system and develop smart repair or replacement strategies tailored to your goals and budget.

## Independent Advocacy

As consultants, we represent your best interests, not a product or contractor—offering unbiased, engineering-backed insights.

## Expert, Interconnected Team

Our multi-disciplinary team includes architects, engineers, AutoCAD techs, and field experts—all working together for seamless results.

## Air & Insulation Management

We address thermal bridging, air leakage, and poor insulation to improve indoor comfort and energy efficiency.

## BECx for New Construction

We lead Building Envelope Commissioning (BECx) to ensure all systems work together—reducing defects, delays, and costly rework.

## Lifecycle Planning & Maintenance

Our proactive testing and planning reduce total cost of ownership while preserving the long-term integrity of your envelope.
